# ARC FLASH

## NFPA 70E Compliance Electrical Safety in the Workplace

- *About 1000 fatalities occur each year due to electrocutions, according to the National Safety Council; Over half of the deaths are caused while servicing energized systems of less than 600 volts.*

### Can You Answer These Questions About Your Facilities?

- Does my facility meet OSHA regulations?
- How does NFPA 70E comply with the OSHA regulations?
- Am I required to perform an Arc Flash analysis?
- Do I have an Electrical Safety Program?

### How We Can Help:

Call us today to schedule a **FREE** lunch and learn session with our experienced engineers. They will explain to you in detail the NFPA 70E requirements and how KTR Associates can protect your employees and company from the dangers of Arc Flash. This informative session will take the mystery out of this confusing and potentially costly regulation!
